Created by SEWOSY, this optional laying extension enables to reinforce the handle's fixing points by deporting them in more solid areas of some types of profiles (in case of aluminium doors for example).

It permits also to ease renovation works, by hiding old fastening holes.

This patented CPREG-NE model is only appropriate for CPREG<sup>®</sup>-2N EM handles made of aluminium in mill finish, with length of 600 mm.

Available on request: powder coating in the most RAL colors.
