Do not choose anymore between a CPREG® electromagnetic handle and your mechanical cylinder!
We have the solution: DECYL®.

This option designed and machined in France was created for you and allows to preserve the existing cylinder, while adding a CPREG®EM handle.

Adapted for locks with axis comprised between 30 and 50 mm, DECYL1 is available as two references:

- **DECYL1** (part sold singly)
- **DECYL1/FAB** (part + handle cutting service)

If you choose the full service, mention DECYL1/FAB when ordering your CPREG® and fill in [this form by clicking here.](#)

Save time on your working sites: no more manual cutting to do yourself; we do it! (5 business days delay, except powder coating time).

Quality finishing ensured by an additionnal end cap, made of anthracite grey plastic - RAL 7026 with SEWOSY DECYL® marking and enhanced graining, giving the piece a nice appearance and protecting it from scratches.

Another advantage: free tailored cut of your CPREG® device, for each ordered DECYL1!
