DECYL[®] : the SEWOSY solution to maintain the mechanical cylinder of a door, while equipping it with a CPREG[®] electromagnetic locking handle.

DECYL1-NE is a development of the DECYL1 option. This part has been designed to enable the installation of a CPREG-NE extension, which is ideal for solidifying the handle fixing points on aluminium doors and/or covering the holes of the old lock. Thanks to these two versions created in France, SEWOSY offers a complete range of products to meet in most cases, the needs of customers who wish to keep a mechanical locking.

Technical specifications :

- Suitable for locks with an axis between 30 and 70 mm
- Graining of the part (improving resistance to scratching)
- Clipping force adapted to the extension
- Colour anthracite grey RAL 7026
- "SEWOSY DECYL[®]" marking

Available alone or as a service (including the cutting of the handle and the extension):

- **DECYL1-NE** (part sold singly)
- **DECYL1-NE/FAB** (part + handle and extension cutting service)

this product ensures top quality finishes, a perfect fit, as well as a significant saving in installation time by choosing the full service.

Indeed, to facilitate the installation, we take care of the cuttings required for the DECYL[®] and offer you the cut to the height of your CPREG[®] profile in our workshop. Production time: 5 working days (excluding powder coating time). When ordering your equipment, select the chosen CPREG[®] handle and extension, mention the reference DECYL1-NE/FAB and complete this form by [clicking here](#).

Always attentive to the situations you face in the field, SEWOSY is constantly innovating to extend its offer and its answers to meet your needs!
