This timer protected by shrink tube is only suitable for devices operating in fail safe mode.

Easy to implement thanks to small dimensions (27 x 62 x 15 mm), it offers up to 8 different opening times with adjustment range from 5 to 60 s. It functions with one NC contact, normally closed when idle, which opens as soon as the push button or any other device activating an action, is released.

Only supplied with DC voltage, in 12V or 24V which can be selected depending on needs, it has a breaking capacity of max. 24V DC - 10 A.
