2 major advantages: easy connection by screw terminal block, ideal for renovation works and time-saving, via serial registering of cards characterize the KRB1000, working as a reader or as a keypad or in both modes.

Supplied with 12 or 24 V AC/DC, fitted with 2 changeover contacts and doorbell function, integrating push button and opening contact inputs, it operates in monostable or bistable configuration. Thanks to self-protection system, blue backlit metal keys, stainless steel housing, it suits for outdoor/indoor use and unlocks up to 2 accesses.

Up to 1010 users can be registered.
